

Fe-Ly-In'

Chase the Dream

Do you have trouble making up your mind?

Well worry no more thanks to the Fe-Ly-In'. Though it appears to be a modest keychain, the Fe-Ly-In' is actually a personal lie-detection device. The wearer simply inserts their index finger into a hole at the bottom of the Fe-Ly-In', pulls the it's arm down, and makes a statement. If the statement is true the cat will vibrate pleasantly as it purrs. If you are lying the cat's eyes will light up red and it will hiss.

Don't Lie to yourself!

It's time to be true,
stop lying to yourself
and go, chase the Dream!
